fyi, you've probably heard from Teddy by now but just to make sure...
Sorry for the compounding your frustration...

Thanks for sending us the new draft this afternoon - I understand that it incorporates the latest changes you guys have made over the past few days. We'll make sure Jared has it first thing in the morning for review, and I know you guys are standing by to walk him through it and provide other support as needed as we all continue to work to finalize.

Jared connected with David, and both confirmed we'd continue to work together, and suggested we set up a call to include Letty Belin and R9 Water and Public Affairs folks regarding coordinating timing and messages. After catching up with Jared this afternoon, I emailed Letty Belin to let her know our schedule and to see if we could set up a call. Letty just called (they're working late in DC!) and we agreed our offices would keep in touch over the next several days as we all continue to move forward.

I'm running for my last bus but am happy to talk more tomorrow.

Subject: California Bay Delta -- Need your Help

Jared,

I have heard from Karen that you spoke with David Hayes. Could you let us know the outcome of your discussion?

After a number of conversations with Karen and others and reading the draft EPA's action plan - I have a better understanding of the Bay Delta Conservation Plan effort (30,000 foot - conceptual level), what it is attempting to achieve and how draft EPA action plan supports that effort (and why). I am also aware of the several miscues and mis-communication that may have transpired over the past couple of weeks that have lead to misunderstanding and frustration internally to EPA - of which I played a part. I am happy to share my observations and understanding with all of you, each of you or whatever combination.

My initial impression is that there is a good story here. I have a better appreciation of our role in supporting water quality (abeit at arms length) as one of the critical linchpins to achieving some balance between a reliable water supply and protecting and restoring the environmental needs of the Delta.

Let me know what assistance I can provide as you decide how we should proceed the next couple of weeks. Karen and I can provide whatever information/briefing you find helpful.

Thanks,  
nw

Subject: Administration announcement on California Bay Delta -- Need your Help

Secretary Salazar, Administrator Lubchenco and Governor Brown expect to make an announcement involving the California water situation in Sacramento on July 25th. Although most of the attention in the lead-up to this announcement has focused on the expected fed/state announcement of a preferred alternative that will be evaluated (along with other alternatives) to address the Delta infrastructure/pumps issue, Ken and I believe that we must include some parallel announcements which demonstrate that the federal government (and the state government) are taking a wide lens when looking at water management needs in California, including the promotion of water conservation, investments in science, and taking action to improve water quality.

Under the MOU that our agencies signed in late 2010, we committed to bring coordinated resources to bear to address these other issues, and we have done so. My question is what announcements we can make on July 25 with regard to these other areas of commitment. I don't think that we should blurt out a laundry list, but instead should focus on two or three major investments that illustrate the non-Delta-centric investments that we are making in sound water management throughout California. So the question is what we can come up with that fits that bill.

For example:

For USDA, we had a great announcement a few weeks ago regarding additional commitments of NRCS funds to help irrigators use their water more efficiently. (You guys have been great on this!) Is there anything more that we could pull into a meaningful announcement?

For EPA, can we help trumpet your new water quality announcement? What can we say about it?

For the Corps, are you funding any armoring of any of the Delta levees/islands or otherwise in making important investments in the Delta?

For DOI agencies, is there any sort of new announcement that we can make regarding a Science Center in the Delta, given previously-announced commitments? (BOR). Or recommitments to Title XVI funding or another "WaterSMART" initiative? (BOR). Or any impending habitat improvement investment(s)? Or an investment in south-of-the-Delta storage to enhance flexibility in the Delta (e.g., proposed SLR rise)? Etc.

Please shoot your thoughts this way. This is a very important exercise.

Thanks.
